

Docket No. F-9034

Ser. No. 10/570,483

APPENDIX I**ALL PENDING CLAIMS WITH AMENDMENTS EFFECTED THEREIN**

1. (Currently Amended) A folded disposable diaper, comprising:

a diaper main body having a front abdomen portion, a back portion, and a crotch portion interconnecting the front abdomen portion and the back portion;

said crotch portion having opposing side edges formed as leg hole sections which are between the abdomen portion and the back portion and define leg holes, said crotch portion extending widthwise between said leg hole sections;

the front abdomen portion having opposing abdomen side edges and the back portion having opposing back side edges, said abdomen side edges being respectively joined to corresponding ones of the back side edges to define a waist opening;

said diaper main body being provided with an absorbent main body at the crotch portion;

waist elastic members attached in an expanded state in a diaper width direction to parts of the front abdomen portion and to parts of the back portion extending along the waist opening;

a leg-hole elastic member attached in an expanded state along each of the leg hole sections;
